

# DOM LEKARSKI

## MEDICOVER

# Clinical Research Partnership Invitation

## Who We Are

Dom Lekarski, based in Szczecin, Poland, has been conducting **clinical trials** for over a decade. We collaborate with a highly specialized and experienced medical team. Our facility is equipped with diagnostic infrastructure and medical equipment, enabling us to conduct Phase I through Phase IV clinical trials. We maintain a robust quality control system and adhere to strict internal procedures to ensure the safety and integrity of each study. Our efficient feasibility process and expedited contracting – completed within two weeks – facilitates swift project initiation and minimizes delays in study start-up.

## Infrastructure and Equipment

- Electronic blood pressure monitor
- Electrocardiograph (ECG)
- Scale with built-in stadiometer
- Refrigerated centrifuge
- Emergency response kit
- Medical-grade refrigerators
- Freezers (-20°C and -80°C)
- 24-hour temperature monitoring system
- Laminar flow cabinet
- Separate, air-conditioned, restricted-access room for medication storage
- Dedicated space for Clinical Research Associates (CRA) during monitoring visits
- Dedicated work area for clinical research coordinators
- All equipment meets current safety and quality standards, verified through appropriate certifications

## Therapeutic Areas

- Oncology
- Hematology
- Cardiology
- Ophthalmology
- Family medicine
- Pediatrics
- Neurology
- Orthopedic Medicine
- Gynecological Medicine

## Contracted External Services

- CT
- MRI
- Scintigraphy
- Ultrasound (USG)
- X-ray
- PET

## Interested in working with us?

Let's discuss the details of a potential collaboration.
